

User guide

Registering with SAML

1 Setting up and using SAML

Getting set up

An existing TechPassport user can add you to the platform from the teams page. When adding a user they fill in your name, email, some information about your role within the company, and select the option to have you log in via your existing SSO protocols.

Your next steps

Once they hit complete, you will automatically receive an email inviting you to create your account and join your team members on TechPassport.

Select the link in this email to begin the registration process.

After this you just have to fill in a few details that help us identify you, such as your name, email and job role. Select the 'Save and Login via SSO' option to complete setup.

Signing in

When you return to TechPassport you will see a button to continue with your company, and can then use this to log in using your regular SSO process.
